HG patio cleaner

HG "patio cleaner" is a very concentrated detergent that has been developed especially for cleaning dirty and stained concrete, slabs and paving stones.

Directions for use: First use a broom to remove as much of the loose dirt as possible. Thoroughly wet the dirty stones and particularly the joints with water. Brush puddles away. Wear rubber/plastic gloves. Pour the bottle into a bowl and add 4 litres of water. Use a scrubbing brush to spread the liquid and scrub. Leave to work for a few minutes. After that, scrub again. Prevent the liquid from drying out. Then rinse off the stones with plenty of water. Once dissolved in water (1:4) the product is not harmful to flowers and plants. In order to protect against regrowth of green deposits after cleaning with HG "patio cleaner", we recommend treating the surface with HG "algae and mould remover".

Coverage: ± 25 m².

Transport and store the bottle upright.

Medical personnel can request the data sheet via +31 (0)36 54 94 777
