

## **HG polished tile cleaner** **(HG product 18)**

HG "polished tile cleaner" is a freshly scented, concentrated mopping cleaner specially developed for regular, easy and quick, streak-free cleaning of all types of (glossy) tile floors and floors made of non-calciferous natural stone.

1 litre is sufficient for 20 washes.

### **Directions:**

#### **For regular cleaning:**

Dissolve 50 ml (half a cup) in half a bucket (5L) of lukewarm water. For more intensive soiling, a stronger solution can be made of 100 ml (1 cup) of this product to half a bucket of water. Then clean the floor with a wrung-out mop or floor cloth, regularly rinsing it in the cleaning solution. Do not rinse or mop dry, simply leave the floor to dry on its own.

#### **For very intensive soiling:**

See the HG floor tile treating matrix on the side of this bottle.

### **Attention:**

#### **Do not use on calciferous natural stone types and slate.**

If the floor has already been cleaned with other products, we advise first cleaning the floor with HG "power cleaner" (polish, wax and dirt remover) (HG product 19), see also the tile floors treating matrix on the side of this bottle. That will remove any residues of other cleaners, which will enhance the result of this product.

The streak-free result can be adversely affected by 1) adding too much product to the mopping water. 2) Mopping too wet. 3) Using extremely dirty mopping water. 4) Using different cleaning products in between. If that results in slight streaking, it can in most cases easily be removed by rubbing with a clean, dry cloth.
