

## **HG polished tile cleaner (HG product 38)**

HG "natural stone polished tile cleaner" is a freshly scented, concentrated mopping cleaner specially developed for regular, thorough, safe and quick cleaning of marble and other types of natural stone floors, without drying. This product leaves nothing behind on the tile, which makes it also extremely suitable for mat floors that must stay mat. 1 litre is sufficient for 20 washes.

### **Directions:**

Dissolve 50 ml (half a cup) in half a bucket (5L) of lukewarm water. Then clean the floor with a wrung-out mop or floor cloth, regularly rinsing it in the cleaning solution. Do not rinse or mop dry, simply leave the floor to dry on its own.

### **For intensive soiling:**

See the HG natural stone floors treating matrix on the side of this bottle.

### **Attention:**

If the floor has already been cleaned with other products, we advise first cleaning the floor with HG "power cleaner" (stripper) (HG product 40), see also the natural stone floors treating matrix on the side of this bottle. That will remove any residues of other cleaners, which will enhance the result of this product. The streak-free result can be adversely affected by: 1) Adding too much product to the mopping water; 2) Mopping too wet; 3) Using extremely dirty mopping water; 4) Using different cleaning products in between. If that results in slight streaking, it can in most cases easily be removed by rubbing with a clean, dry cloth.
